Projects

Woof Spot Website Project

- Woofspot is a free app designed to connect dog lovers within local, trusted communities. It enables users to discover nearby dogs, participate in activities, and seek assistance from fellow community members. The website also facilitates setting up playtimes, allowing dog parents to engage with the canine community.

- [Live Link](#)

Blutomatic Website Project

- Blutomatic is a platform that offers AI-driven content creation services utilizing custom avatars. Their primary goal is to assist businesses in producing professional, camera-free content that enhances brand engagement and reach.

- [Live Link](#)

Furniture E-Commerce Web Design

- Designed a complete web interface for a furniture e-commerce platform, showcasing a user-friendly product catalog, easy-to-navigate product filters, and an intuitive checkout process. The design emphasizes a seamless shopping experience with detailed product pages, inventory updates, and personalized recommendations.
